---

This technical information contains general specifications only. When ordering, please check the full-specification with detailed information.
RF Components

■ Coplanarity

0.05mm max. difference in Z-direction as follows:

\[
\text{Coplanarity} = T_1 - T_2
\]

Each terminal extends the full length of the TDK RF Components. Hence, any coplanarity deviation between terminals is due to curvature in the substrate. TDK guarantees that the edge of each terminal is within 0.05mm of the horizontal plane. For specifications of each product, please contact us.

■ Storage Conditions

- Temperature: +5 to +30 °C
- Humidity: 20 to 70% RH
- Term of storage: Within 12 months (After the delivery) *
- Baking: Unnecessary

* After peeling off cover tape, do not keep exposing the products to the open air. For the products stored longer than 12 months, confirm their terminals and solderability before use.

■ Moisture Sensitivity Level

- MSL: Equal to LEVEL 1

Note: Product is not resin molded type. Baking is not required.

This technical information contains general specifications only. When ordering, please check the full-specification with detailed information.
Note 1: The Port Extension function on the Network Analyzer is used to extend the calibration plane to the DUT terminals.
Note 2: Loss in the PCB traces is compensated for by measurement data taken on a PCB Thru’ line.
Note 3: Line width of evaluation board should be designed to match 50 ohm characteristic impedance depending on PCB material and thickness.

This technical information contains general specifications only. When ordering, please check the full-specification with detailed information.
**Note 1:** The Port Extension function on the Network Analyzer is used to extend the calibration plane to the DUT terminals.

RF Components

■ Carrier Tape Peel Back Force

Peel back force of top tape

Peeling angle

Peeling direction

Top cover tape

Carrier tape

- Peel Angle : 165 to 180 degree against the fixed surface of tape
- Peel Speed : 300mm ± 10mm per min
- Peel Force : 0.1 to 1.0 N (8mm tape width)

■ Leader and Trailer Tape Length

A : Trailer Section (Blank components) 160mm min.
B : Component Section
C : Leader Section 100mm min.
D : Top cover tape (Alone) 400mm min. (C+D)

RF Components

■ Product Origin

1. TDK Electronics Factories Corporation, Akita, Japan
2. TDK Dalian Corporation, Dalian, China

■ Cautions

1. Do not use and store the component in following conditions. Performance may deteriorates.
   1-1. Exposure to atmosphere containing corrosive gas, such as Cl₂, NH₃, SOₓ and NOₓ.
   1-2. Exposure to volatile or combustible gases.
   1-3. Exposure to excessive dust.
   1-4. Exposure to water.
   1-5. Exposure to direct sunlight.
   1-6. Exposure to freezing temperature.
   1-7. Exposure to dew condensation due to high humidity.

2. When assembling the printed circuit board with the component mounted, be sure that
   residual stress is not given to the component due to the overall distortion of the printed circuit
   board and partial distortion such as at screw tightening portions.

3. Do not use the components above the maximum allowable operating temperature.
   Surface temperature including self heating should be below maximum operating temperature.

4. The components are not designed or warranted to meet the requirements outside of the
   contents regulated in this specifications.

This technical information contains general specifications only.
When ordering, please check the full-specification with detailed information.
