Temperature sensor (NTC)
NTC sensor assembly / systems

NTCGP series (Resin dipping multilayer element)

Resin dipping type

- **FEATURES**
  - Adopts a multilayer element type NTC thermistor.
  - Fast heat responsiveness due to its small size.
  - Lead-free product.

- **APPLICATION**
  - Room temperature detection (air conditioners, fan heaters etc.)
  - Temperature control (surface of toilet seats with warm water washing feature, etc.)
  - Water temperature detection (hot water pots etc.)
  - Temperature detection (refrigerator compartments, heated carpets etc.)

- **SPECIFICATIONS**

- **SHAPE & DIMENSIONS**

![Dimensions in mm](image)
Temperature sensor (NTC)
NTC sensor assembly / systems

**NTCGP series (Resin dipping multilayer element)**

**Lug terminal type**

- **FEATURES**
  - Possible to affix using a fasten screw and to perform stable temperature detection of the mounting surface.
  - Can be used for a wide temperature range (–40°C to +125°C).
  - Can be installed in vehicles.

- **APPLICATION**
  - Temperature detection (inverters for solar power generation and projectors)
  - Substrate temperature detection (converters for HEVs and EVs)

- **SPECIFICATIONS**
  - Thermistor: Resin dipping multilayer element type
  - Wires: AWG26 (Sn-plated 0.16mm²) parallel cable with polyethylene (heat proof 125°C)
  - Wire tip: Wire strips, crimp terminals, and connectors are available.
  - Operating temperature range: –40°C to +125°C
  - Heating time constant: 6s max. (in still oil)
  - Heat dissipation constant: 3mW/°C (in still air)

Temperature sensor (NTC)
NTC sensor assembly / systems

**NTCRP series** (Glass-encapsulated radial lead)

**PPS resin case type / 200°C heat resistance**

**FEATURES**

- Excellent ATF resistance.
- Operating temperature range: –40°C to +200°C
- Fast heat responsiveness due to its small size.

**APPLICATION**

Coil temperature detection for EV, HEV and PHEV drive motor
Inner temperature detection for the servomotor used for various industries

**SPECIFICATIONS**

| Thermistor | Glass-encapsulated radial lead |
| Wires      | Fluorinated wire |
| Wire tip   | Wire strips, crimp terminals, and connectors are available. |
| Operating temperature range | –40 to +200°C |
| Heating time constant | 10s max. (in still oil) |
| Heat dissipation constant | 1.9mW/°C (in still air) |

Temperature sensor (NTC)
NTC sensor assembly / systems

**NTCDP series** (Glass-encapsulated axial lead)

**PPS resin molding type oil temperature sensor with O-ring**

### FEATURES
- High heat resistance.
- Excellent oil resistance and ATF resistance.
- Detection portion is sealed by an O-ring allowing for direct detection of oil temperature.

### APPLICATION
- Oil temperature detection for ATF, transmission oil, oil heaters, etc.

sensor_ntc-thermistor_assembly_en
Temperature sensor (NTC)
NTC sensor assembly / systems

NTCDP series (Glass-encapsulated axial lead)

Resin case type for home appliances and industrial machinery

**Features**
- Excellent in high responsiveness, high heat resistance.
- High reliability with glass-sealed axial lead thermistors.

**Application**
Temperature detection of refrigerator and vending machine compartments (air conditioners, refrigerators, vending machines, dishwashers, etc.)

**Specifications**

REMINDER FOR USING

Be sure to request specification sheet before using.

SAFETY WARNING

Pay careful attention to all warnings and operate only in accordance with safety specifications. Incorrect usage may lead to destroyed NTC thermistors and damages or malfunctions with the devices used.

⚠️ CAUTION

- Ensure to use thermistors under proper operating and mounting condition and only as specified in a product catalogue or final specification.
- This thermistor is designed for the intended purpose. Do not use for any other purposes.
- Use thermistors only within the specified operating temperature range.
- Use thermistors only within the specified power range.
- The specified dissipation factor of the thermistor must not be exceeded. Exceeding this limit may cause fire through temperature increase with the resistance change of the NTC thermistor.
- Alert consumers that the thermistor in the application must not be touched by bare hands directly.
- The thermistor should be stored in original packaging under the following environment: Temperature: –10°C to +40°C, Relative humidity: less than 75%. Avoid rapid temperature change, direct sunshine, corrosive gas, dust, mechanical stress or pressure.
- During design process, be sure to test the application reliability after the thermistor assembly to confirm there is no abnormality.
- Be sure to design safety circuit or prepare same functional sensor to prevent accident when the thermistor is used as sensor.
- Avoid to apply vibration, mechanical shock (drop), or pressure more than specified.
- Avoid to repeat bending the thermistor more than specified.
- Avoid to apply force more than specified.
- Avoid to bend strongly or make external force for outlet of the thermistor of the product is with terminal.
- Fix thermistor head side to bend or cut the lead wire.
- Contacts on lead wire surface should be clean without any stain and rust to avoid contact failure.
- Prepare following countermeasure to prevent the influence of noise.
  - Protection circuit
  - Shield of thermistor (include lead wire).
- Pay attention following items to install the thermistor to prevent malfunction caused by incorrect measurement of thermistor.
  - Prevent the influence of heating element or cooling device so that the thermistor element part
  - When detecting object surface, fix between thermistor and the object by high conductive
- Please take consideration an appropriate fail-safe function in customer application which requires a very high level of operational safety and reliability or could endanger society or human life. Please contact us before using the NTC thermistor assembled for the following application if those malfunction of failure might have serious damage to human life, health or one's property and severe influence on society. Application: cars, aerospace/aviation equipment, medical equipment, nuclear power plant equipment.
