

PoC Sample Book —FPD-Link

TDK Corporation

Electronic Components Business Company

Magnetics Business Group

Aug. 21, 2026

Notice

- The current values and ambient temperatures of the PoC filters described in this document are based on the specifications of each product.

No.	Criteria	Ref.	Frequency Range [Hz]	Max bias current [mA]	Ambi. temp. [°C]	Part1		Part2		Part3		Total Rdc (Max) [mΩ]	Product Area [mm ²]	Max Height [mm]
						L1	R1	L2	R2	L3	R3			
1	FPD-Link III		1.25M~700M	200	105	ADL3225V-470MT-TL000	-	-	-	-	-	900	8.00	2.50

- Please note that the allowable current values and ambient temperatures for PoC filters may vary depending on the actual operating environment.
- Do not use the product beyond the conditions described in the datasheets attached to this sample book
- The S-parameter limit lines for FPD-Link IV are not plotted because they are not publicly available.

Layout of PoC Filter

FPD-Link III & IV

Explanation of the proposal table

Example of combinations :
ADL2012-2R2M + VLS3015CX-220M-H (1.0k)

Total Rdc (Max) [mΩ]	Product Area [mm ²]	Max Height [mm]
1160	12.25	1.75

	ADL2012-2R2M	VLS3015CX-220M-H	1005size Resistor
Outline size	LxW (typ.) = 2.2x1.25 mm 	LxW (typ.) = 3.0x3.0 mm 	LxW (typ.) = 1.0x0.5 mm 
Rdc (Max)	500 mΩ	660 mΩ	-
Product Area (Typ)	2.2 x 1.25 = 2.75 mm ²	3.0 x 3.0 = 9.00 mm ²	1.0 x 0.5 = 0.50 mm ²
Product Height (Max)	1.75 mm	1.50 mm	-

■ Total Rdc

Sum of the Rdc Max values for each inductor.

$$500 + 660 = \underline{\underline{1160 \text{ [mΩ]}}}$$

■ Product Area

Sum of the area calculated from the product dimensions (typ value) of the inductor or resistor.

$$2.75 + 9.00 + 0.50 = \underline{\underline{12.25 \text{ [mm}^2\text{]}}}$$

■ Max Height

The highest product height in the filter configuration.

$$1.75 \text{ or } 1.50 \Rightarrow \underline{\underline{1.75 \text{ [mm]}}}$$

Products Information

ADL Series

ADL2012 (for High Frequency) Wire Wound

In Mass Production

Features

- Small size and thin form factor (mounting area 2.2 x 1.25 mm, height 1.75mm max.)
- Achieving broadband impedance characteristics and good DC superimposition characteristics as the result of an original coiled wiring design and original structure
- Operating temperature range: -40 to +135°C (including self-temperature rise)
- Compliant with AEC-Q200

Product image & Dimensions

Recommended Land pattern

Electrical Characteristics

Isat : based on "the inductance change rate". (30% below the nominal inductance value.)
Itemp (105°C) : based on "the temperature increasing". (Temperature increase 30 deg.C by self heating.)
Itemp (125°C) : based on "the temperature increasing". (Temperature increase 10 deg.C by self heating.)
*Itemp. are reference values evaluated on a single-layer PCB with a total thickness of 1mm and a Cu layer thickness of 70um.
Temperature rise is highly dependent on many factors, so it should be verified under application conditions.

Impedance Characteristics

-  : The blue cells are listed and contain samples.
-  : White cells are not enclosed. Please contact the sales person in charge.

ADL32VHC (High Impedance) Wire Wound

In Mass Production

Features

- Small size and thin form factor (mounting area 3.2 x 2.5 mm, height 2.5mm max.)
- Achieving broadband impedance characteristics and good DC superimposition characteristics as the result of an original coiled wiring design and original structure
- Operating temperature range: -55 to +150°C (including self-temperature rise)
- Compliant with AEC-Q200

Product image & Dimensions

ADL3225VT-4R7M-TL000	4.7	0.10	720	1500
ADL3225VT-100M-TL000	10	0.15	450	1300

Isat : based on "the inductance change rate". (30% below the nominal inductance value.)
Itemp : based on "the temperature increasing". (Temperature increase 40 °C by self heating.)

- : The blue cells are listed and contain samples.
- : White cells are not enclosed. Please contact the sales person in charge.

ADL Series

ADL4532VK (for High Current) Wire Wound

In Mass Production

Features

- ADL4532VK is available for High current application
- ADL4532VK series corresponds to RoHS.
- Operating temperature range: -55deg.C to 155deg.C (Self-rise temperature included)
- Based on AEC-Q200

Electrical Characteristics

Part #	L at 100kHz [uH] ±20%	DCR max. [ohm]	Isat. typ. [mA]		
			Ambient temp. [°C]		
			25	105	125
ADL4532VK-3R0M-TL000	3	0.125	2100	1650	1300
ADL4532VK-100M-TL000	10	0.235	1250	1200	940
ADL4532VK-160M-TL000	16	0.470	950	830	640

Isat. : Current value at -30% inductance change (relative to nominal value) in DC superposition.
Itemp. 105°C: Current value at 50°C self-heating when a product is mounted on the board for self-heating measurement.
Itemp. 125°C: Current value at 30°C self-heating when a product is mounted on the board for self-heating measurement.
*Itemp. are reference values evaluated on a single-layer PCB with a total thickness of 1mm and a Cu layer thickness of 70um.
Temperature rise is highly dependent on many factors, so it should be verified under application conditions.

-  : The blue cells are listed and contain samples.
-  : White cells are not enclosed. Please contact the sales person in charge.

ADL8030VA (1 Coil Solution) Wire Wound

In Mass Production

Features

- Robust construction for a high mechanical stability
- Qualified according to AEC-Q200
- High Impedance for wide frequency range
- Suitable for pick and place and AOI (Automatic Optical Inspection)
- Suitable for lead-free reflow soldering as referenced in JEDEC J-STD-020E
- RoHS-compatible

Electrical Characteristics

Part #	L at 100kHz [uH] +/- 20%	DCR max. [ohm]	Isat. typ. [mA]	Itemp. typ. [mA]		
				Ambient temp. [°C]		
				25	105	115
ADL8030VA-100M	10	0.38	2400	820	730	720
ADL8030VA-150M	15	0.47	1800	790	680	660
ADL8030VA-180M	18	0.52	1700	770	650	630
ADL8030VA-220M	22	0.57	1500	740	600	570
ADL8030VA-680M	68	1.69	800	420	350	340
ADL8030VA-101M	100	2.54	700	330	280	270

Isat. : Typical permissible DC with inductance decrease ΔL/L0 ≤ 30% at T_ambient
Itemp. : Maximum permissible DC with temperature increase of ≤ 40 K at T_ambient
*Itemp. are reference values evaluated based on IEC 62024-2, class B.
Temperature rise is highly dependent on many factors, so it should be verified under application conditions.

-  : The blue cells are listed and contain samples.
-  : White cells are not enclosed. Please contact the sales person in charge.

ADM32FSC-220M	22	0.60	740	740	680	660

Isat. : Based on the inductance change rate (30% below the initial value)

Itemp. : Based on the temperature increase (+40 °C by self-heating) Ambient temperature: +25 °C / +105 °C / +125 °C

*Itemp. are reference values evaluated under consideration of generic multilayer PCB.

Temperature rise is highly dependent on many factors, so it should be verified under application conditions.

Impedance Characteristics

: The blue cells are listed and contain samples.

: White cells are not enclosed. Please contact the sales person in charge.

ADM45FDC

Wire Wound

In Mass Production

Features

- Operating temperature range: -40°C to +150°C
- Suitable for lead-free reflow soldering as referenced in IPC/JEDEC J-STD-020E
- Qualified to AEC-Q200
- RoHS compatible

Isat: Based on the inductance change rate of -30% of the initial value.

Itemp: Based on the temperature increase by self-heating.

At 25°C and 105°C: Itemp value calculated with 40°C self-heating, based on test PCB design acc. IEC 62024-2, current class A (≤1A).

At 125°C: Itemp value calculated with 25°C self-heating, based on test PCB design acc. IEC 62024-2, current class A (≤1A).

Impedance Characteristics

: The blue cells are listed and contain samples.

: White cells are not enclosed. Please contact the sales person in charge.

MLD Series

Datasheet

MLD2016 (High current)

Multilayer

In Mass Production

Features

- Being achieving high reliability by material application that was suitable for Automotive application and products design.
- In complete monolithic structure with multilayer cluster, be reducing flux leakage.
- Operating temperature range: -40deg.C to +125deg.C (including self-temperature rise)
- AEC-Q200

Product image & Dimensions

MLD2016S3R3MTD25	3.3	0.23	800
MLD2016S4R7MTD25	4.7	0.25	750

Rated current : based on "the temperature increasing". (Temperature increase 40 deg.C by self heating.)

Impedance Characteristics

- : The blue cells are listed and contain samples.
- : White cells are not enclosed. Please contact the sales person in charge.

MLJ Series

MLJ1005-G (Small & Wide band)

Multilayer

In Mass Production

Features

- The small multilayer inductor ideal for PoC circuits.
- A wide band and high impedance characteristics are realized by the original circuit structure.
- It is suitable for high current applications due to its good DC superimposition characteristics due to the low loss ferrite material.
- Operating temperature range: -55deg.C to +125deg.C
- AEC-Q200

MLJ1608-G (Wide band)

Multilayer

Features

- The small multilayer inductor ideal for PoC circuits.
- A wide band and high impedance characteristics are realized by the original circuit structure.
- It is suitable for high current applications due to its good DC superimposition characteristics due to the low loss ferrite material.
- Operating temperature range: -55deg.C to +125deg.C
- AEC-Q200

MLZ Series

MLZ1608-C (High current) Multilayer

In Mass Production

Features

- The small multilayer inductor ideal for PoC circuits.
- The MLZ series include inductors for decoupling circuits that have top-class DC superimposition characteristics and low resistance.
- Operating temperature range: -55deg.C to +125deg.C
- AEC-Q200

MLZ2012-H (Super High current) Multilayer

In Mass Production

Features

- The MLZ series include inductors for decoupling circuits that have top-class DC superimposition characteristics and low resistance.
- They are compatible with wide frequency band noise, from low to high frequency.
- MLZ2012-H type products have a rated current that is equivalent to that of wound coils.
- Operating temperature range: -55deg.C to +125deg.C
- AEC-Q200

TFM Series

TFM201210ALMA (Low DCR, Low profile)

Thin Film

In Mass Production

Features

- The thickness of this product is 1.0mm,and it is very thin compared with other same kind of products.
- This product consists of original fine copper pattern with micro-processing technology .
- This product corresponds to RoHS.

Electrical Characteristics

*Listed items are part of the full lineup.

Part #	L at 100kHz [uH] +/- 20%	DCR max. [ohm]	DCR typ. [ohm]	Isat. max. [A]	Isat. typ. [A]	Itemp. typ. [A]
VLS5045EX-100M-H	10	0.0793	0.061	3.1	3.2	2.5
VLS5045EX-150M-H	15	0.143	0.110	2.2	2.6	1.9
VLS5045EX-220M-H	22	0.1625	0.125	2.0	2.2	1.8
VLS5045EX-470M-H	47	0.390	0.30	1.3	1.4	1.0
VLS5045EX-680M-H	68	0.533	0.41	1.1	1.2	0.90
VLS5045EX-101M-H	100	0.754	0.58	0.80	1.0	0.70
VLS5045EX-151M-H	150	0.949	0.73	0.56	0.66	0.61

Isat : based on "the inductance change rate". (30% below the initial inductance value.)
Itemp : based on "the temperature increasing". (Temperature increase 40 deg.C by self heating.)

*Itemp. are reference values evaluated under consideration of Cu thickness single layer PCB 100x40x1.6mm.
Temperature rise is highly dependent on many factors so it should be verified for application conditions.

Impedance Characteristics

 : The blue cells are listed and contain samples.

 : White cells are not enclosed. Please contact the sales person in charge.

VLS Series

VLS6045EX-H

Wire Wound

In Mass Production

Features

- Package size is 6.6mm max.(L) X 6.3mm max.(W)
- VLS6045EX-H is available for High current
- VLS-EX series corresponds to RoHS.
- Operating temperature range from -40deg.C to 125deg.C
- (Self-rise temperature included)
- Compliant with AEC-Q200 Rev.D
