

## Longevity and ECO Friendly

In order to extend the longevity, our products execute “TDK global static wear leveling (TDK SMART SWAP)” and level P/E count of NAND flash cells(blocks) efficiently. Storages replacement is Low frequency and it is Lower TCO (Total Cost of Ownership).

## TDK global static wear leveling (TDK SMART SWAP)

## Clipping (Number of sector setting)

Possible to adjust number of sector for user data area in unit of a sector.
