

Test Report issued under the responsibility of:

**TEST REPORT**  
**IEC 60950-1**  
**Information technology equipment – Safety –**  
**Part 1: General requirements**

**Report Number** .....: 31182226.016

**Date of issue** .....: June 1, 2017

**Total number of pages** .....: 165 pages

**Applicant's name** .....: TDK-Lambda Ltd.

**Address** .....: 56 Haharoshet St., P.O.B. 500 Karmiel Industrial Zone Karmiel  
2161401, Israel

**Test specification:**

**Standard** .....: IEC 60950-1:2005 (Second Edition) + Am 1:2009 + Am 2:2013

**Test procedure**.....: CB Scheme

**Non-standard test method**.....: N/A

**Test Report Form No.**.....: IEC60950\_1F

**Test Report Form(s) Originator**.....: SGS Fimko Ltd

**Master TRF** .....: Dated 2014-02

**General remarks:**

SMT was checked as the report template does not include a selection for CTF Stage 3, but the testing location is registered as CTF Stage 3

"(See Enclosure #)" refers to additional information appended to the report.

"(See appended table)" refers to a table appended to the report.

**Throughout this report a  comma /  point is used as the decimal separator.**

**Manufacturer's Declaration per sub-clause 4.2.5 of IEC60950-1:**

The application for obtaining a CB Test Certificate includes more than one factory location and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided.....:

- Yes**  
 **Not applicable**

The units manufactured in each factory are fully identical. All tested samples are representing products from each factory.

**Name and address of factory (ies) .....** : 1) TDK-Lambda Ltd.

56 Haharoshet St., P.O.B. 500 Karmiel Industrial Zone Karmiel 2161401, Israel

2) WUXI TDK-LAMBDA ELECTRONICS CO LTD  
 NO 6 XING CHUANG ER LU WUXI JIANGSU  
 214028 CHINA

**General product information:**

All products are Class I, designed for Installation Category II and Pollution Degree 2.

HFE2500 power supply modules may be used separately from the accessory rack HFE2500-S1U in accordance with the "Conditions of Use".

The accessory rack HFE2500-S1U is intended for use only with HFE2500 power supply modules.

RFE2500 power supply modules are same with the HFE2500 power supply modules (el. schematic, components, mech. construction) and have minor differences due to using of separate input TB, separate signals connectors and output bus-bars instead of common I/O connector which used in HFE2500 power supply modules.

Accessory rack HFE2500-S1U is Pluggable Type A.

For HFE2500/RFE2500 power supply modules using separately and for the accessory rack HFE2500-S1U-TB the means of connection to the mains shall be specified in end-installation.

For the accessory rack HFE2500-S1U the appliance couplers are considered as disconnect devices.

The HFE2500/RFE2500 power supply modules themselves and the accessory rack HFE2500-S1U-TB have no disconnect device provided with unit. An appropriate disconnect device shall be provided by end-installation.

Model HFE2500-48/S-CQC is fully same with base model HFE2500-48/S.

Model HFE2500-12/S-R/RE is fully same with model HFE2500-12/S-R but has a different rating.

All outputs considered SELV and separated by reinforced insulation from primary mains.

All outputs are unearthed and may or may not be connected to earth in end-installation.

The maximum operational altitude for all units: 3000 meter above sea level.

The max. ambient:

- HFE2500: 50°C, 70°C (with output de-rated)
- HFE2500-R (reverse air flow): 50°C, 55°C (with output de-rated)
- RFE2500: 50°C, 70°C (with output de-rated)
- HFE2500-48/S-CQC: 50°C, 70°C (with output de-rated)
- HFE2500-12/S-R/RE: **42°C**
- HFES1U rack: 50°C, 70°C (with output de-rated)

Model variations:

1. HFE2500-48, HFE2500-32, HFE2500-24 or HFE2500-12:

- Basic power supply modules without communication option;
- Followed by "/S"-with communication option;
- Followed by "/POE" (HFE2500-48 only)- with output circuit additionally meets of requirements of IEEE 802.3 Standard.

2. Accessory rack HFE2500-S1U:

- Basic model: with IEC inlets on the rear side;
- Followed by “-TB”- option with input terminal blocks instead of IEC inlets.

3. HFE2500-LAN is optional communication module which may be used in the complete set of the accessory rack HFE2500-S1U and powered by +12 VDC from auxiliary output of power supplies within the rack or separately by an external +12V supply in accordance with the user manual.

Variable:	Range of variable:	Content:
x	/S – with communication option blank-without	(all models) external communication
y	/POE - with output circuit additionally meets of requirements of IEEE 802.3 Standard blank-standard model	For HFE2500-48 only
z	-R – with reverse air flow blank-standard air flow	(HFE2500 only) standard air flow: front to rear
u	-CO – conformal coating used blank-without conformal coating	(all models) conformal coating used for environmental protection only
w	-TB- with input terminal blocks instead of IEC inlets blank-with IEC inlet	For HFE2500-S1U rack only

#### Test Report History:

[31182226.001](#)-original report

[31182226.003](#)-New test report for an upgrade of standard according to IEC60950-1:2005+A1

[31182226.005](#)-Amendment 1 to 31182226.003 for the listing of an alternate PCB-material in the list of Critical Components. The PCB is manufactured by an alternate manufacturer but according to identical specification and drawings from the applicant which haven't changed.

[31182226.006](#)-New test report for an upgrade of standards according to from (IEC 60950-1:2005 +Am 1:2009) to (IEC 60950-1:2005 + Am 1:2009 + Am 2:2013) and (EN 60950-1:2006 + A11:2009 + A1:2010 + A12:2011) to (EN 60950-1:2006 + A11:2009 + A1:2010 + A12:2011+ A2:2013)

[31182226.008](#)-Amendment 1 to report 31182226.006 for addition of suffix “z” to models HFE2500-48.

Explanation below.

-CQC (HFE2500-48/S only)-identification for specific customer, fully same with base model HFE2500-48/S.

[31182226.010](#)-Amendment 2 to report 31182226.008 for correction of typing error: missed tables of clearance and creepage distance measurements (tables 2.10.3 & 2.10.4) for model HFE2500-XYZ.

Reference report 31182226.001

[31182226.011](#)- New CB report. This report covers the following:

- Additional models HFE2500 reverse fan
- RFE2500, HFE2500-48/S-CQC and HFE2500-12/S-R/RE, correction of Critical Component List
- Change of configuration code.

[31182226.013](#)- Amendment 1 to report 31182226.011 for adding the follow:

- Alternate Fan “Nidec model: W40S12BHA5-53”.

[31182226.014](#)- Amendment 2 to report 31182226.011 covers listing of optional communication module

HFE2500-LAN; adding of different marking for components used in HFE2500-12/RFE2500-12; correct listing of p/n of CN101/CN1101 in critical components list; correction of listing of L101, L102 in critical component list; changing of input/output rating for model HEF2500-12/S-R/RE from Iout=180A to Iout=190A, from Pout=2200W to Pout=2300W and from Iin=14A to Iin=15A; adding IEC60950-1: 2001 National Differences for Japan.

**31182226.016 – Amendment 3 to report 31182226.011 covers changing of output rating for model HEF2500-12/S-R/RE from Vout=12VDC to Vout=12.6VDC, from Iout=190A to Iout=185A, from Pout=2300W to Pout=2331W, changing of max. ambient temperature from Ta max.=40°C to Ta max.=42°C, changing fan's model for HFE2500-12/S-R/RE from W40S12BHA5-52 or W40S12BHA5-53 or V40S12BHA5-53 to same as for standard models of HFE2500/RFE2500 modules.**

#### Abbreviations used in the report:

- normal conditions	<b>N.C.</b>	- single fault conditions	<b>S.F.C</b>
- functional insulation	<b>OP</b>	- basic insulation	<b>BI</b>
- double insulation	<b>DI</b>	- supplementary insulation	<b>SI</b>
- between parts of opposite polarity	<b>BOP</b>	- reinforced insulation	<b>RI</b>

#### Indicate used abbreviations (if any)

- primary	PRI
- ground (protective earth)	GND
- safety extra low voltage	SELV
- terminal block	TB
- Triple Insulated Wire	TIW

#### CONDITIONS OF USE:

- All units shall be installed in compliance with the enclosure, mounting, spacing, casualty, segregation and other safety related requirements of the final application.
- The main outputs (48VDC, 32VDC, 24VDC or 12VDC) have been investigated for SELV with energy hazardous level
- Auxiliary output (12VDC) has been investigated for SELV with non-energy hazardous level
- All outputs are separated by reinforced insulation from supply mains and primary circuit. Outputs are unearthed and may or may not be earthed during product installation.
- When HFE2500/RFE2500 units used separately the voltage for Dielectric Strength Test should be based on the maximum supply voltage for end-product.
- A suitable Electrical and Fire enclosure shall be provided for HFE2500/RFE2500 units by the end-product.
- The products shall be properly bonded to the protective earth in the end-product.
- For accessory rack HFE2500-S1U an appliance coupler(s) is considered as Disconnect device(s). HFE2500/RFE2500 units and accessory rack HFE2500-S1U-TB have no disconnect device provided with unit. An appropriate disconnect device shall be provided by end-installation.
- All units were tested on a 30A branch circuit for each AC input. If used on a branch circuit greater than listed above, an additional testing may be necessary.
- The max. ambient:
  - HFE2500-50°C, 70°C (with output de-rated)
  - HFE2500-R (reverse air flow)-50°C, 55°C (with output de-rated)
  - RFE2500-50°C, 70°C (with output de-rated)

- HFE2500-48/S-CQC-50°C, 70°C (with output de-rated)
- HFE2500-12/S-R/RE-**42**°C
- HFES1U rack-50°C, 70°C (with output de-rated)
